EXPERIENCE

LaFleur Tech Private Limited

Chandigarh, India | June 2026 – July 2026

Backend Developer Intern

- Worked as a backend engineer on ExpoConnect, a mobile application, contributing from ideation through prototype development.
- Owned database management for the application, designing and maintaining the data layer to support core app features.
- Built the backend for a short-video streaming interface, handling upload, storage, and delivery flows.
- Implemented user management functionality, including JWT-based authentication and authorization.

Tech Stack: Node.js, React Native, MongoDB, JWT Authentication

ScorpTech Innovation PVT. LTD.

Kolkata, India | June 2025 – August 2025

Web Automation Intern

- Developed a Python script to pull emails from 100k+ CIN records in Excel, cutting 3 weeks of manual work down to about 2 hours.
- Built and iterated on 2 scraping pipelines (Selenium, BeautifulSoup) for static and JS-rendered sites, and improved data collection time by ~70%.

Tech Stack: Python, Pandas, BeautifulSoup, Selenium, Playwright, Multithreading

Freelance Mobile App Developer

Remote | October 2024 – November 2024

Self-Employed

- Built a Blinkit-style delivery app in Flutter for a local business, covering product listing, cart, and order flow from scratch.
- Deployed the frontend on Vercel and the backend on a cloud server, taking requirements straight from the client and shipping on time with no major bugs.

Tech Stack: Flutter, Dart, REST APIs, Postman | Frontend | Backend

PROJECTS

Recommendation-as-a-Service (RaaS)

Ongoing

Python, FastAPI, SQLAlchemy 2.0, PostgreSQL, Pydantic, Alembic, Pytest | [GitHub](#)

- Building a multi-tenant Recommendation-as-a-Service platform with configurable recommendation capabilities across multiple applications, enforcing strict tenant_id + project_id data isolation.
- Built an async SQLAlchemy 2.0 + PostgreSQL persistence layer (Item/Event models, JSON/JSONB attributes, repository abstractions, bulk operations, Alembic migrations) and a modular pipeline of Candidate Generators, Filters, Rankers, and Post-Processors.
- Added YAML/Pydantic configuration, structured logging, custom exception handling, and caching, backed by 201 passing automated tests.

PlaceMentor AI – AI-Powered Placement Prep Platform

December 2025 – January 2026

FastAPI, Streamlit, PostgreSQL, Celery, Redis, Docker | [Live](#) | [GitHub](#)

- Built a full-stack platform that parses resumes with PyMuPDF and scores them against job descriptions using TF-IDF and cosine similarity, with synonym-aware skill matching.
- Implemented JWT-based auth with Bcrypt, offloaded PDF parsing/scoring/interview evaluation to Celery + Redis workers, and built an interactive Streamlit + Plotly dashboard, all containerized with Docker Compose.

Sampark – Real-Time Chat App

July 2025 – August 2025

Flutter, Dart, Firebase, BLoC, GetIt | [Amazon AppStore](#) | [GitHub](#)

- Real-time chat app live on Amazon AppStore. Built it with Clean Architecture so adding features later doesn't break everything.
- Firebase covers auth, messaging and file storage. Also added voice messages since users tend to expect it these days.

EDUCATION

University of Engineering & Technology, Chandigarh

Chandigarh, India | 2023 – 2027

Bachelor of Engineering – Computer Science Engineering

Relevant Courses: Data Structures & Algorithms, Data Mining, Operating Systems, DBMS, Computer Networks, OOPs

Maharishi Arvind Public School, Kota

Rajasthan, India | 2023

12th – CBSE Board

Maharishi Arvind Public School, Kota

Rajasthan, India | 2021

10th – CBSE Board

SKILLS

- Languages: C, C++, Dart, Python, HTML, CSS, JavaScript, SQL
- Frameworks & Libraries: Flutter, Node.js, FastAPI, Streamlit
- Databases: PostgreSQL, MongoDB, SQLite, Firebase, Supabase
- Tools & Infra: Git, GitHub, Docker, Docker Compose, Celery, Redis, Postman, Vercel
- Platforms & Soft Skills: Android (Amazon AppStore), Web, Linux | Problem Solving, Client Communication, Self-Learning, Time Management
